Energy
Delivering a Bright Future

Marco R., NorthWestern Energy Biologist

Keeping watch over our wildlife and reliability.

Every day across Montana, our team members are balancing the need to provide reliable energy and protect the environment. Luckily, we have dedicated programs to help support these efforts and incredible partnerships within our communities that allow us to accomplish so much more than we could on our own. Our Osprey Project is just one example of how local resource agencies, volunteers and our on-staff biologist can improve service reliability while delivering a bright future to some of this state's most beloved wildlife.
